

PC Services

I usually work on an agreed price basis. It is fine quoting a price by the hour but sometimes it can run into many hours to fully complete a task. Rather than just do a quick fix, I prefer to do a job thoroughly and completely sort the problem out. An idea of costs is: Virus Removal

One thing we all hate and can hit anyone at anytime. Sometimes it is just a case of removing the virus and everything is fine. Other time it can be more difficult if a system file or other parts of the operating system are affected.

Charge from £50 and includes up to a whole day (8 hours) to complete the task. Upgrades

Memory Upgrade from £20 plus parts.

Hard Drive Upgrade from £50 plus parts.

Motherboard Upgrade from £70 plus parts and includes a full reinstall of the operating system if required.

Licensed copies of operating system required for a system install.

Licensed copies of any additional software required if to be installed at time of the operating system.

Motherboard upgrade is dependent on the existing specification of the computer. Existing power supply and/or case may not be suitable for an upgrade.

Special rates for senior citizens and disabled. Broadband Installation

Prices quoted on the basis that you already have the parts/equipment

Installation of filters and setting up broadband with modem - £30

Installation of filters and setting up broadband with router - £50 (Networking additional PCs/Laptops £10 each)

Installation of filters and setting up wireless router with network for two computers £70 (£10 for each addition PC/lap top)

Prices are valid for any distance within 30 miles of Witham Essex.

All above prices are indications and may vary according to circumstances. Price quoted before a job is the price you pay for that job. Any additional work required will be quoted at the time and will not be carried out without your approval. Free Estimates
